## Sita Karki

Sita Karki is a computer engineer from Kathmandu, Nepal, who is passionate about using data to solve real community problems. She graduates in December 2026 from Himalayan Institute of Technology with a GPA of 3.84 and will begin a Master of Data Science in Darwin in 2027. Sita founded Code Pahadi, a free coding club that now teaches more than 180 rural girls across six schools. She has also led the Women in Technology Society, worked as a data analyst for a Kathmandu consultancy and led flood recovery training for 300 villagers. Her crop disease detection app for farmers won first place at the 2025 National Student Innovation Showcase. In the Northern Territory she hopes to build her data analytics skills, volunteer in the community and later work on data projects that help remote communities. Outside study, she enjoys hiking, cooking momo for friends and mentoring younger students whenever she can find the time.
